

# 10FT, 20FT & HC 20FT OFFSHORE CONTAINERS WITH DOUBLE DOORS

Our offshore containers with double doors are available in 10ft, 20ft, and 20ft high cube ISO containers with CSC approval.

The containers include chain slings, and are available with either wooden or steel flooring. Double doors allow for access from both ends for when the goods are being loaded and unloaded - making it ideal for storage. Offshore containers are insured with DNV 2.7-1 certification, are well designed, and built to withstand many years of use.

The offshore container is used primarily to transport goods, which may include conventional cargo containers, bulk containers, special containers, equipment, and containers for gas cylinders. Available as both used and new - new containers can be delivered with your logo.
