

CHRISTMAS AT THE ZOO

For this year's big "Christmas at the Zoo" event at Aalborg Zoo, DC-Supply has provided custom built container solutions for both sales stalls and Santa's cabin.

Join in an atmospheric Christmas trip around the world at Aalborg Zoo - focusing on the animals of the garden and the continents they originally come from, this year you can experience a gigantic light festival where the garden is illuminated by 100,000s of light. DC-Supply, among other things, helped build Santa's cabin, where the children can visit Santa Claus and tell him what they most want for Christmas. Here is real "hygge" and Christmas atmosphere with small windows, fir and garlands a like! You will find Santa's cabin right next to the reindeer barn. We have also delivered sales stalls in custom-built containers, where you can find delicious sweets as well as inspiration for exciting Christmas gifts for the whole family.

Christmas at the Zoo takes place 15-30. November Friday-Sunday, and all days 1- 30. December (except December 24). See more at <https://aalborgzoo.dk>

At DC-Supply we have extensive experience building custom container solutions for all types of events and exhibitions. No task is too big, too small or too imaginative - our experienced staff is ready with advice and guidance for your particular project.
