

# COMMAND CENTER FOR ESBERN SNARE

The ESBERN SNARE is a support ship for the Navy's command ship, the ABSALON, which patrols the Gulf of Aden off the coast of Somalia.

The Esbern Snare needed a facility which could be put up on the deck of the ship. The facility was to act as a kind of office and command center, where meetings and briefings could be held. The facility had to be established on the deck of the ship.

DC-Supply provided a solution with seven custom-built containers that were built into one unit. With this container solution, the Danish navy got a mobile and flexible solution that could be moved around the ships as needed. The container had built-in steel frames for the installation of air conditioning, and was designed with an effective dehumidifier.
