

CONSTRUCTION SITE FACILITIES

Here at DC-Supply we can supply customised residential and housing facilities for construction sites. Read more here.

At DC-Supply, we manufacture custom-built residential solutions. We can supply customized residential and housing facilities for construction sites. DC-Supply can provide accommodation for a family or several hundred men. Whatever your need, we have the solution.

When a contractor requires living facilities for his craftsmen, he contacted DC-Supply. We can deliver a custom solution that covers all the needs of the employees. A container building that has a common dining room, kitchen, office, and a toilet, shower and changing room. For this construction site, we delivered a series of twelve linked containers and one storage container. The ground floor was built from eight linked containers with a kitchen, canteen, toilet, shower, and changing room for eight people per container. The 1st floor was composed of a kitchen, canteen, and meeting room.

The advantage of a modular solution is that the container buildings can be quickly scaled up or down as needed. ISO standard size of the modules is equal to a fast and smooth transport.

Technical specifications:

Stairs to the first floor

Interior:

A common dining room, kitchen, office, and toilet, shower and changing room.

Inventory:

Canteen modules are furnished by the trailer regulations with tables, chairs, and refrigerators.

The offices are furnished with desks and chairs.
