# CUSTOM BUILT ACCOMMODATION FOR 8 PEOPLE – ILULISSAT, GREENLAND

DC-Supply provided a custom-built container solution for a contractor in Ilulissat, Greenland – supplying living quarters for 8 people to stay in comfort. The solution is based on insulated standard 20-foot ISO containers with CSC approval. Delivery time from approved drawings until handoff, was only 12 weeks.

This custom built container solution comfortably housing 8 people, is built on a steel frame to accommodate for any displacements that may happen in the underground. The set-up is designed around two levels, and comes equipped with an external staircase and stair landing.

The containers are insulated specifically for the sometimes harsh Greenlandic conditions, ensuring that the accommodation stays comfortable even in very cold weather. The windows are maintenance-free white PVC windows with double glazing, and also come with window grilles and ventilation. The exterior doors are insulated galvanized steel. Heating is supplied from an oil furnace (hot water radiators with thermostat). The client chose to install his own water tank for heat and consumable water as well as his own supply-connection.

Inside, the custom-built living space in each container is comprised of two separate bedrooms, a common kitchen- and living room area, as well as a shared toilet and bath. Thus allowing ample space for socializing yet at the same time, allowing privacy when needed.

At DC-Supply, we have a vast amount of expertise and experience in delivering custom built container solutions to the sometimes harsh Greenlandic environment. We have the knowledge and the knowhow - not only when it comes to insulation work but also with the supply solutions needed, regardless if this is via external connection or with the establishment of self-sufficient units. Furthermore, our many years of experience with recertification of CSC approvals, along with cost-effective transport from our production facilities in Denmark to delivery in Greenland - makes us a strong partner for you or your clients in Greenland. If you are a resident or supplier to Greenland, you are more than welcome to contact us for further information - we are ready to help.

Give us a call or send an email if you have any questions, or would like advice. We are ready to help.
