

CONTAINER FOR DRY WEAPONS STORAGE

The insulated dry weapons storage container is based on a 20ft ISO container.

It is designed with interior sandwich panels made of fire-retardant material. The container is designed with a bright double entrance that can be locked.

The dry weapons storage container is a customized with secure racks and lockable equipment cabinets for extra security. It is also fitted with extremely flexible weapon racks for several types of weapons. Additionally, it also comes with a flexible and grounded rail system with fixed shelves for weapons and the like.

The container has an efficient dehumidifier connected to the container wall duct, where a hygostat controls the dehumidifier, based upon the levels of humidity.

- Option for further connection of electricity supply
- Electric heating panels
- Special built-in electrical panel for connecting heaters, dehumidifier, etc.
- Externally, the container is connected to the electricity supply via a built-in, strong steel box
- Vinyl flooring extends 10 cm up the walls for easy cleaning and the floor is provided with ground connection
- Anti-burglar steel cover on the air conditioning mounting frame
